

Best specialist referral practice

We were thrilled to be nominated for three categories at the 2008 Private Dentistry Awards- best specialist referral practice, best marketing and most attractive practice.

We competed against top dental practices from around the UK and were delighted to come away as first runner up and the highest placed orthodontic practice in the best specialist referral practice category. Fingers crossed that next time we come away with 1st prize!

The Total Orthodontics team

The team at Tonbridge

New & improved facilities in Kent

The team at Tonbridge celebrated their move into number 20 Lyons Crescent, with a cocktail party at the new practice in March. The evening gave local dentists the chance to have a look around our new state-of-the-art facilities, which include three surgeries, digital xray room and a spacious waiting area.

At the end of last year our Sevenoaks staff were also celebrating, after expanding to accommodate a further two surgeries. "The extra surgeries have tripled the practice's capacity and waiting lists have already been reduced," said Practice Manager Scott Relf. "The vast majority of the build was completed in just 4 weeks and thanks to staff pulling out all the stops we were able to keep things running smoothly" added Scott.

One of the new surgeries at Sevenoaks

Comic Relief FUNdraising

In March the team at Hayward's Heath spent two days fundraising, to help raise money for Comic Relief.

Staff made a donation to come to work dressed in red or fancy dress, with costumes including a cow, a clown and batman! Patients were also able to join in with a competition to guess the hidden celebrity. The winner was actually our own Jenny Webb, who kindly donated her winnings.

Thank you to everyone who contributed. The money raised will help to pay for 19 mosquito nets or enable 6 girls in Zambia to attend primary school for 1 year.

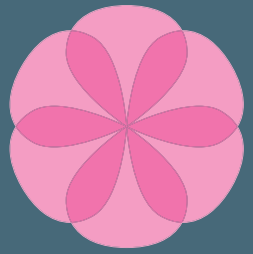

Richard Jones on Radio 2

Richard Jones, a Specialist Orthodontist at our Horsham, Crawley and Haywards Heath practices was invited onto the Jeremy Vine show last month, to talk about the recent publicity surrounding Liam Treadwell (the winner of the grand national) and his less than perfect teeth.

Richard joined Esther Rantzen to discuss the psychological and functional benefits of orthodontics, as well as the more obvious aesthetic benefits of a straight smile.

Following his interview on Radio 2 Richard was then asked to appear on Radio 4 later that same day. To listen to Richard's interviews visit our website www.totalorthodontics.co.uk.

Say cheese

We offer private patients the opportunity to capture their stunning new smile, with a free photo session at Venture- the UK's leading portrait photographers.

As well as the photo session, which provides a great experience for all the family, patients get to choose a favourite snap to have framed as a 10" x 8" portrait-free of charge.

Here are some of the results.....

Frances- treated by Grant Harris

Eleanor (far left) Edward (second from right) and Arthur (far right)- all treated by Rod Ferguson

Contact us

We have practices in Brighton, Crawley, Cranbrook, Haywards Heath, Horsham, Lewes, Sevenoaks, Tonbridge and Tunbridge Wells

Retainer Care

Once you have completed your treatment it's vital that you continue to wear your retainers as instructed by your orthodontist. If left to their own devices your teeth will have a tendency to move back to their original position.

For peace of mind we offer private patients the opportunity to take out Retainer Care, where for a small monthly fee your fixed and removable retainers will be covered for any repairs or replacements. For more information on Retainer Care please speak to a member of our team.

Damon Q

Damon Q is a new self-ligating brace, which offers patients increased comfort due to its lower profile brackets. Self-ligating braces have a sliding mechanism that holds the wire in place. This means there is no need for rubber bands, which cause friction and increased pressure. The benefits of self ligating braces include increased patient comfort, faster treatment times and less likelihood of extractions.

Hannah, Former Patient

Younger sibling?

Children as young as nine can benefit from an orthodontic consultation, and by coming to see us sooner rather than later we can identify any potential problems that would benefit from interceptive treatment.

Contrary to popular belief you don't need to be referred to us by your dentist and if you're under 18 the consultation is completely free. What's more if you already have a sibling in private treatment and decide to go private too you'll receive approximately 10% off the cost of your treatment.
